

Aleksandar Stojanović

Blockchain Security Engineer | L1/L2 Infrastructures, DeFi & ZK

✉ al.stojanovic0@gmail.com 🔗 [stojanovic00](#) [stojanovic00](#) 🏠 Novi Sad, Serbia

Summary

Blockchain security engineer with extensive auditing experience across multiple ecosystems (Ethereum, Solana, and Cosmos). Skilled in consensus and governance, DeFi protocols, and the underlying infrastructure of L1/L2 solutions, including cross-chain protocols and privacy-preserving mechanisms leveraging ZK. Background in data engineering, cloud, and high-performance computing before specializing in distributed systems security.

Skills

🔧 Go, Rust, Solidity, Typescript, C#

🗄️ PostgreSQL, MongoDB, LevelDB, HDFS

🏢 Foundry, Anchor, Cosmos-SDK, .NET

🔗 Git, Docker, Kubernetes

Experience

Informal Systems

Security Engineer

Remote

Jan 2025 - Feb 2026

Threat modeling and inspection: applied a structured methodology to surface vulnerabilities by formalizing system-wide invariants and validating their correctness.

Invariant and fuzz testing: primarily conducted using Foundry and specific Rust crates. Simple example inside **Anoma token's** project: <https://github.com/informalsystems/anoma-token/pull/1>

Formal verification: Model-based testing approach using Quint to formally specify and verify protocol correctness through executable specifications. **Circlefin** spec I worked on: <https://github.com/circlefin/malachite/pull/814>

Collection of public Informal Systems audit reports to which I contributed: <https://github.com/stojanovic00/public-audit-reports-informal-systems>

NovaLite

Full stack Software Engineer Intern

Novi Sad, Serbia

Oct 2022 - Nov 2022

Projects

WALL-ET - Ethereum Wallet Extension (Winner of ETH Novi Sad hackathon)

A browser extension wallet for Ethereum focused on an enhanced user experience through account abstraction (implements EIP7702). Flexible and secure account management, multisignature support, and social recovery. <https://github.com/cirko33/wall-et>

Incognito - Confidential targeted marketing platform (ETH Sofia bounties winning project)

A platform that utilizes iExec's Data Protector for confidential data processing, powering an AI model for selecting suitable customers. It also contacts them confidentially using iExec's Web3 mailing tool. <https://dorahacks.io/buidl/17725>

Hyperledger Fabric bank system

Hyperledger Fabric private blockchain network dedicated to the banking system, alongside a client app for communication with the blockchain.

<https://github.com/stojanovic00/hyperledger-fabric-bank>

Education

Faculty of Technical Sciences

High-Performance computing

Master's (GPA 10.0)

Novi Sad, Serbia • Oct 2023 - Oct 2024

Petnica Science Center

Web3 Camp

Valjevo, Serbia • August 2024

Faculty of Technical Sciences

Electrical and Computer Engineering

Bachelor's with honours (GPA 9.59)

Novi Sad, Serbia • Oct 2019 - Sept 2023
